A. GENERAL

1. Rates for local calling are applicable to the duration in minutes (rounded upward) of each message originating from a measured-rate line and terminating at a location within the Local (serving) Exchange or within an Extended Service Area as set forth in Section 5, Local Exchanges, Extended Area Service and ZUM Zone 3.
2. All services listed may be furnished from any central office serving the exchange or district area at the discretion of the Company.
3. The rate for PBX trunks applies for each trunk ordered. Direct Inward Dialing Service (DID) station numbers may be purchased at rates set forth in this section.
4. Customers who subscribe to DID numbers for PBX trunks are required to keep 50% or more of the assigned numbers working at all times in order to retain assignment of their entire block of numbers. Customers must notify the Company if their usage level drops below 50% so that action can be initiated to reclaim the DID numbers.
5. In the Sierra Madre Exchange, the Company will provide, own and maintain all facilities between the central office and the boundary of the base rate area used to furnish service in the mountainous area located outside the base rate area and within the exchange area. The customer will provide, own and maintain all facilities used to provide service between the customer's station and the point of connection with the Company's facilities at the base rate area boundary. Exchange rates, based on the point of connection, will apply to these services.

LOCAL EXCHANGE SERVICE

I. SPECIAL CONDITIONS (Continued)

F. DIRECT INWARD DIALING SERVICE (DID) (Continued)

2. Extended Basic Referral

Extended Basic Referral permits incoming DID trunks to be placed on intercept and routed to a "change number announcement." This service allows a business DID customer who is relocating within the Company or changing numbers to have as many internal lines placed on intercept as desired. Dialing the customer's former DID number results in a prerecorded message which announces the new number.

- a. Extended Basic Referral is offered to DID customers in five (5) DID number increments and is subject to the availability of facilities.
- b. Extended Basic Referral is offered as an enhancement to basic intercept service.
- c. Extended Basic Referral can only be ordered by business customers under two nonrecurring charge options. These service options are intervals of six months and twelve months.
- d. The customer can designate the quantity in five (5) DID Number increments to be placed on this service.
- e. This service must be ordered coincident with a service order request associated with discontinuing or changing a DID Number.
- f. The nonrecurring charge is in addition to all other Service Order Charges, Section 3 that may apply when this service is ordered.
- g. This service can only be ordered where DID service is offered.

3. Direct Inward/Outward Dialing Service (DIOD)

- a. Direct Inward/Outward Dialing Service (DIOD) is a central office based service that permits incoming calls to reach customer provided equipment without the assistance of an attendant, and allows the trunk to be used to place outgoing calls. This service is provisioned with E&M signaling and a 4-wire connection at the customer's premises. Touch Calling is a required feature of this service. Rotary hunt does not apply.
- b. The assignment of telephone numbers and the sequence of numbers assigned to a customer are made at the discretion of the Company. Telephone number charges, terms and conditions found in the DID section of this Product Guide apply to DIOD service.
- c. Customer-Provided Switching Systems must handle calls to all assigned numbers, including those that are not currently used with specific stations. Calls to numbers not currently used with specific stations must be routed by the customer to a recorded announcement referring the caller to another number.
- d. Trunks arranged for DIOD service may not be combined with trunk groups arranged to provide Direct Inward Dialing (DID) service. Overflow of calls between the two arrangements is not permitted.

Effective: April 1, 2016

LOCAL EXCHANGE SERVICE

I. SPECIAL CONDITIONS (Continued)

F. DIRECT INWARD DIALING SERVICE (DID) (Continued)

3. Direct Inward/Outward Dialing Service (DIOD) (Continued)

- e. DIOD service is provided from central offices equipped to provide this service and subject to the availability of facilities.
- f. If a customer's normal serving central office is not equipped to provide DIOD service or the customer so requests, the service may be provided where facilities permit, from a Company central office different than that which normally serves the customer, but still within the same LATA, at the additional rates specified herein and under the terms and conditions applicable for Foreign Exchange (FX) service.
- g. See Section 2 for termination liability terms and conditions.
- h. When DIOD service becomes available or is subsequently requested from the central office that normally serves the customer, the service may be transferred to the normal serving central office. If the customer requests such a transfer, the customer will be subject to a change in telephone numbers and will also incur initial nonrecurring charges and applicable Service Order Charges in Section 3.
- i. A change in central office equipment could require the customer to discontinue the service or obtain service from another central office. The Company makes no guarantees and assumes no liability for loss of service to the customer, resulting from the conversion or upgrade of central office equipment.
- j. DIOD service works in conjunction with Direct Inward Dialing (DID) service and the charges specified in II. RATES are in addition to applicable rates and charges for DID service specified in II. Rates and Charges following.

G. PBX DISCOUNT PRICING PLAN (DPP)

- 1. Customers subscribing to the 12, 24, and 36 month PBX Trunk Discount Pricing Plans are eligible for IntraLATA Toll usage discounts. Customers may also receive discounts on DID Service.
- 2. Minimum Monthly Billing
 - a. IntraLata Toll Service

A minimum monthly billing applies for all IntraLATA Toll usage as follows. For customers with a 12, 24 or 36 month PBX Term and less than 5000 minutes of use (MOU) per month, the Minimum Monthly Billing will be \$25.00 per PBX Trunk. For customers with a 12, 24, or 36 month PBX Term and 5000 or more MOU per month, the Minimum Monthly Billing will be negotiated.

The Company will true up the actual toll usage annually. If the amount is less than 12 times the total PBX trunks multiplied by the per trunk minimum, the customer will be billed for the difference.

The customer is also liable for the minimum monthly billing should the service be terminated.

b. IntraLata Toll Service

The liability for customers with less than 5000 MOU per month will be \$25.00 per trunk for the initial ordered quantity of PBX Trunks times the number of months remaining in the term.

c. In the event the customer terminates service within the first 30 days of subscription or automatic renewal term, the customer will be liable for the applicable monthly rate incurred by the customer and nonrecurring charges; however, the Termination Liability will be waived. If the customer terminates service after 30 days of subscription or renewal but prior to completion of the term commitment period, the customer shall be liable for an early termination charge and nonrecurring charges.

4. A Customer's volume discounts may be calculated based on an aggregate of all locations statewide.

5. Additional PBX trunks and DID groups may be added under a Discount Pricing Plan (DPP) at the same rate as the current DPP for the remainder of the DPP term.

6. Before the expiration of a discount pricing plan period, a customer may elect to subscribe to a new Discount Pricing Plan with the same or longer term period than the current plan. When a new discount pricing plan is chosen, the new rate applies for the new term period and the previous rates no longer apply.

7. Section 17, Frontier Calling Plans has a list of services for which Discount Pricing Plans are available.

IV. TERMINATION LIABILITY¹

FTR Solutions for Business Bundle is offered on a month-to-month or two-year term agreement.

Early termination of a Solution for Business Bundle term agreement by the customer during any month of the two-year term will result in an early termination charge except as noted in the FTR Solutions for Business Bundle Satisfaction Guarantee or as described below:

PLAN 1 - one-time flat Termination Charge of \$50.00.

The customer must contact the Company prior to the end of the term agreement in order to renew it. Upon renewal, the customer shall pay the prevailing rate for the term period selected.

If the customer does not renew the term agreement before it expires, the customer shall continue on a month-to-month basis and shall pay the prevailing monthly rate, on a monthly basis, until the customer cancels the service or requests a new term agreement. Customers will be subject to all prevailing rules and regulations of the package, including rate changes. Payment of such rate shall constitute the customer's acceptance of the continued service.

PLAN 2 - The amount of the early termination charge will be 100% of the monthly recurring charge(s) (MRC), excluding any promotional discounts, for the line(s) being terminated multiplied by the remainder of the term in months. The remainder of the term will be the number of days left in the 24-month term divided by 30.

The term of all lines subscribed to or renewed under Plan 2 and within the same account, will be coterminous based upon the date of the first line established.

At the end of each term, the plan will automatically renew for another two-year term under the same terms, except that the monthly rate will be adjusted to the prevailing plan rate in effect at the time of renewal. Alternately, the customer may call anytime within 30 days before the end of a term to arrange for termination of the service or conversion to a month-to-month service at the end of the then current term. Customers may also terminate their term plan within the first 60 days following an automatic renewal and the early termination charge will be waived.

Solutions for Business lines subscribed to under Termination Liability Plan 2 may not be combined with other voice services or features under a term commitment. Other voice services and features may only be combined with lines under Termination Liability Plan 2 when these other voice services and/or features are purchased on a month-to-month basis.

III. SPECIAL CONDITIONS (Continued)

D. ISDN-BASIC RATE INTERFACE (BRI) SERVICES

1. BRI Services are digital exchange services which include station connections and network access.
2. BRI Services offered from this Product Guide include from two (2) to five hundred (500) parings of a BRI Line with either an ISDN Access Service or an ISDN Multipoint Access Service and with one variation of Central Office Elements. The Central Office Elements can be arranged in a variation suitable to customer requirements but will include no more than two B-Channel Elements and one D-Channel Element.
3. BRI Services provided on a Foreign Exchange basis are provided on an ICB basis.
4. BRI Services provided in accordance with this Product Guide are available to customers requiring from two (2) to five hundred (500) BRI Lines. Customers requiring more than five hundred (500) lines will be provided service at rates and charges and with respect to conditions specified in individual agreements.
5. No more than one voice-type Service Package will be provided for each BRI Line, regardless of the number of voice-type B-Channels. Each Service Package is associated with a BRI Line, not with a channel.
6. Each BRI Line within a system may be uniquely arranged with one of several Service Packages and with any combination of B-Channels.
7. ISDN Access and ISDN Multipoint Access are services which terminate BRI Lines at the central office and permit access to the exchange network. One access (either ISDN Access or ISDN Multipoint Access) is required for each BRI Line.
8. An ISDN Access arranges a BRI Line for an individual user.
9. An ISDN Multipoint Access arranges a BRI Line for multiple users or arranges a BRI Line for more than one voice-type B Channel.
10. The B Circuit Switched Data Channel (B-CSD) assigns circuit switched data traffic to one of the two B Channels of a BRI Line. The CSD channel operates at a maximum speed of 64 kbps (Switched 64 kbps) but may be used at a speed of 56 kbps (Switched 56 kbps).
11. Both B Channels of a BRI Line may be arranged for B-CSD.
12. Data sent to locations within a system and to interexchange carriers over B-CSD Channels can be transmitted at either 64 kbps or 56 kbps. (Some interexchange carriers do not offer transmission at 64 kbps.)
13. Data sent to locations within other systems must be transported at a speed of 56 kbps, if permitted. If permitted, the rates, charges, and conditions will be specified by the Company's Product Guide.
14. The B Voice/CSD Channel arranges a BRI Line with the capability to alternate transmission between Voice and Circuit Switched Data over the same B Channel. Both B Channels may be arranged for B Voice/CSD.

D. ISDN-BASIC RATE INTERFACE (BRI) SERVICES (Continued)

15. The D Packet 1 Switched Data Channel allows transmission of packet-switched data over a D Channel. Subscription to a D Packet element without subscription to B Channel elements is permitted.
16. B Packet service provided to customers who require packet switched data service to access the DPN100 public switched network¹. Orders for the Communication Assistance for Law Enforcement Act (CALEA) will continue to be provisioned from 5ESS switches as access to the public switched network is not required.
17. Attendant Services
 - a. Attendant Services require compatible customer-provided equipment. Functions performed with equipment at the customer's premises must conform with the Company's operating practices and procedures in order to maintain service levels.
 - b. The Attendant Services package requires a single B-Voice Channel configuration on the BRI line.
18. Service Orders
 - a. Temporary disconnections (for vacations or other reasons) and facility reservation of BRI services are not permitted.
 - b. Minimum Service Requirement - Subscribers will be billed a minimum equivalent to the rates for continuing service for three months and charges for establishing service.
 - c. Directory Listings will be furnished in accordance with the rates and conditions of this Product Guide.
 - d. A change in service from Centrex or Basic Exchange Access Line services to BRI services is a discontinuation of service and an establishment of service. Termination liabilities will not apply to changes if the customer subscribes to the same number or to more lines. However, all applicable installation and service connection charges and all charges applicable to the establishment of BRI service apply.
 - e. A change in services will cause a temporary interruption of service.

D. ISDN-BASIC RATE INTERFACE (BRI) SERVICES (Continued)

20. ISDN Multipoint Access

- a. Multipoint Access allows connecting from one to eight users on an individual BRI line.
- b. Multipoint Access is required for connecting two B-Channel Elements for voice on the same BRI line.
- c. Only one user will be allowed to access each B-Channel. Other users on the same BRI line can access the D-Channel only.
- d. Up to eight users can share simultaneously the same D-Channel of a D-Channel packet switching arrangement.
- e. Multipoint Access to a BRI line connecting an attendant's console is not permitted.

21. Individual Line Loop Extension

ISDN Individual Line Loop Extension provides a physical extension of the BRI loop from approximately 18,000 feet to approximately 36,000 feet when provided from an ISDN capable Central Office. This physical extension is accomplished by means of a CO installed power module and an outside plant installed regenerator or U-Repeater.

The deployment method is based upon dB loss and not on specific cable footage. The vendor installation information indicates that up to a 34dB loss at 40kHz in either direction of the field repeater is acceptable. With the Frontier engineering practice of maximum loss for the ISDN BRI loop to be 38dB at 40kHz, it is assumed, if the customer's distance would exceed the 38dB for standard installation, the U-Repeater would be mounted within stated range of 34dB and the customer's length would be extended another 34dB from the U-Repeater installation point.

The customer will not be charged the ISDN BRI Individual Line Loop Extension rate unless the equipment is actually used. The charge will not be invoked based on the cable footage. The power module is designed to be used only with the U-Repeater and the repeater can only be used with the power module. The appropriate Individual Line Loop Extension rate will apply in addition to rates for Basic Rate Interface and Single Line Services.

22. Automatic Call Distribution - Management Information System (ACD/MIS)

- a. ACD/MIS is available to either existing or new ISDN-BRI customers.
- b. ACD/MIS will be furnished only from central offices that are technically capable and equipped for providing the service.
- c. Customers will be required to provide compatible customer premises equipment (CPE). Frontier makes no guarantees and assumes no liability associated with the customer's receipt of data if the CPE does not meet Frontier compatibility requirements.
- d. Customers must have the Basic ACD Feature Package before subscribing to the Advanced ACD/MIS features.
- e. Advanced ACD/MIS customers will need one MIS Data Link for each supervisor workstation access.
- f. Multipoint ACD/MIS customers can place two agents on one ACD line. Each agent uses one B channel and shares the D channel.

23. Exception Provisioning

- a. Exception Provisioning provides ISDN-BRI Service to customers served by a non-ISDN capable central office.
- b. The Exception Provisioning monthly rates will apply in addition to rates for Basic Rate Interface Services.
- c. The monthly rates for Exception Provisioning include a rate for provisioning and a rate for Special Transport mileage. The Special Transport mileage rate applies to provide the transmission facilities between the customer's serving central office and the ISDN capable office. There is no additional charge for Special Transport Termination.

E. ISDN-PRIMARY RATE INTERFACE (PRI) SERVICE

1. General

Integrated Services Digital Network-Primary Rate Interface (ISDN-PRI) Service provides digital access for integrated services between the customer's premises and the serving central office via a 1.544 Mbps facility. ISDN-PRI denotes an end-to-end digital network capable of supporting a combination of public and private network access services. ISDN-PRI is an alternative for individual access services, such as Two Way, Direct Inward Dialing (DID), Direct Outward Dialing (DOD), 800 Service, OutWATS Service, and local business trunks.

ISDN-PRI Service is available to customers where facilities permit. Customers must provide compatible premises switching equipment for terminating the D Channel and the 1.544 Mbps high capacity digital services facilities.

ISDN-PRI Service is typically divided in capacities of twenty-three 64 Kbps B Channels and one 64 Kbps D Channel (23B+D). The D Channel carries the out-of-band signaling required to control its associated B Channels on one or more 1.544 Mbps high capacity digital facilities where technology permits.

When requesting ISDN-PRI Service, the customer must specify the minimum and maximum number of channels to be used for exchange, access and data services as well as any other information needed for the Company to provide service.

The availability and functionality of ISDN-PRI features and capabilities may vary by serving central office.

The minimum subscription period for each ISDN-PRI Service is one month.

ISDN-PRI Service may be provided from a Frontier alternative central office if a customer's serving central office is not suitably equipped, or if the customer chooses to subscribe to service from a different Frontier central office. The customer may be required to utilize the telephone numbers and dialing plan associated with the designated ISDN-PRI central office. Additional charges for High Capacity Digital Facility and Special Transport will apply to the Switched Facility between the customer's serving central office and the ISDN-PRI capable central office, except when the ISDN-PRI capable central office is part of a Remote Switching Cluster, as defined in III.A.

PRI Station Detail Billing is only available with measured-rate service.

Individual PRI Station Call Detail is for informational purposes only. Exact billing information is located in the Measured Call Summary portion of the customer's bill.

The customer's ISDN Primary Service must be equipped with Calling Party Default Directory Number with the Calling Party Screening option. Customers will not have the option to change the Calling Party Number and CPN may not be deleted.

Customers will have the option to define a partial listing in the screening list. Specific call details will not be provided for stations not included in the screening list. The screening list may not include 800 numbers, fictitious numbers, private network numbers or Centrex Dialing Plan numbers defined in the screening tables.

Station Call Details will only be provided for valid telephone numbers within the switch providing the customer's ISDN Primary Service.

F. DIGITAL (ISDN) SINGLE LINE SERVICES

1. Digital (ISDN) Single Line Service is intended for customers requiring ISDN access on a single line basis. All terms and conditions associated with ISDN-Basic Rate Interface Services, except the condition specifying a minimum line requirement, apply to Digital (ISDN) Single Line Service.
2. Digital (ISDN) Single Line Service for business customers will be provided on a measured-rate basis for voice and data calling.
3. Customers who require intercom functionality may subscribe to Basic Rate Interface (BRI) Services. Business customers will be migrated to BRI through a subsequent order process.

OPERATOR SERVICES

II. SPECIAL CONDITIONS

A. METHOD OF APPLYING RATES

1. Operator Handled Service

(a) Charges for all classes of telephone calls are billed against or collected from the calling telephone number. However, upon request, calls between points within the Frontier Calling Area may be placed on a non sent-paid basis and toll charges may be:

- Billed against or collected from the called telephone number, except a coin telephone number and a COPT telephone number (i.e., charges may be reversed) if the charges are accepted at the called station.
- Billed against or collected from a third telephone number or account, except a coin telephone number and a COPT telephone number anywhere in the United States or Canada where such billing is accepted at the third telephone.
- Exception - California Relay Service calls may only be billed to a third number within California.
- Billed against another telephone company (credit) calling card account when the party requesting such billing is authorized to use such (credit) calling card.

(1) Calling Card Service (Direct Dialed) applies when the originating call is completed without the assistance of an operator, where equipment is available. ¹

(2) This service also applies to calls that require operator assistance ² which is limited to entering the Calling Card number to complete the call and recording the Calling Card number for billing purposes.

(3) This service also applies to calls that require operator assistance to:

- a. Place a Calling Card operator station service call when equipment capability precludes the foregoing.
- b. Place a Calling Card operator station service call for customers who identify themselves as being handicapped and unable to dial.

¹ This service also applies to calls placed from a public telephone.

² Charges are applicable only to calls placed originally as a Direct Dial Calling Card call and not applicable to collect or third number billing on which the "billed-to-number" person accepts the charges, but requests the charges be billed to a Calling Card. The applicable charge for the latter two calls is the Operator Handled Station-to-Station charge.

Effective: October 19, 2016

I. DESCRIPTION (Continued)

D. Verification and Emergency Interrupt Service

1. General

Verification and Emergency Interrupt Service is furnished where and to the extent that facilities permit. The customer shall indemnify and save Frontier harmless against all claims that may arise from either party to the interrupted call or any person.

a. Verification

- (1) Frontier furnishes Verification Service for the purpose of aiding subscribers with legitimate call completion problems. Upon request, the operator will verify and provide the line status condition of a subscriber line.
- (2) A subscriber-originated request for verification of a number other than an emergency agency number is a chargeable verification request if a Company Operator determines that the line is in use. No charge applies if the line is out of order.

b. Emergency Interrupt Service

- (1) Frontier furnishes Emergency Interrupt Service when a subscriber who has originated a verification request to a line which has been found in a busy talking state informs the operator that an urgent or emergency situation exists and requests that the operator have the busy line cleared.
- (2) A subscriber-originated request for Emergency Interrupt to a number other than an emergency agency number is a chargeable Emergency Interrupt request.

2. Application of Rates and Charges

- a. No charge will apply if the requesting customer identifies that the call is to or from an official public emergency agency. An official public emergency agency is defined as a government agency which is operated by the federal, state, or local government, and has the capability and legal authority to provide prompt and direct aid to the public in emergency situations. Such agencies include the local police, state police, fire department, licensed hospitals, etc.
- b. Charges may not be billed on a collect basis or on a third-number basis to the number being verified or interrupted.
- c. If the number verified is not in use, or as a result of interrupt the line is cleared, and, at the calling party's request, the operator completes the call, the charges as specified in Section 28, II. Rates and Charges of this Product Guide apply in addition to the applicable verification and emergency interrupt charges.

CALIFORNIA TELECONNECT FUND (CTF) DISCOUNTED SERVICES

III. AVAILABILITY (Continued)

F. Voice Exemption

Pursuant to CPUC Decision 16-04-021. CTF discounts for Voice Services will be reduced from 50% to 25% on July 1, 2016. CTF recipients or prospective applicants in unserved or underserved areas of California can apply for a Voice Exemption to maintain their 50% discount on their voice services if they are using dial-up telephone service as the only means to access the Internet. An entity can verify if its location is eligible for a Voice Exemption by using the California Broadband Availability map on the Commission's CTF web site. Upon approval of the Voice Exemption by the Commission, their location will maintain the 50% discount for voice service, but will not be eligible for CTF discounts on other data or access services at that location. CTF entities that are located only in unserved or underserved areas and using dial-up telephone service as the only means to access the Internet may apply for the Voice Exemption to maintain the 50% voice discount. Once approved, they will not be eligible for discounts on any other services at that location.

IV. FUNDING

If the Executive Director of the California Public Utilities Commission (CPUC) determines that there are insufficient funds to reimburse the Utility for its claims against the CTF, the CPUC will promptly inform the Utility concerning this condition and direct the Utility to suspend the offering of applicable discounted rates to qualifying Schools, Libraries, Government Owned Hospitals, Government Owned Health Clinics, and Community Based Taxed Exempt Organizations on a schedule consistent with fund balances and utility claims and with appropriate prior notice to customers.

V. DISCOUNTS APPLICABLE TO ELIGIBLE SERVICES

A. Schools and Libraries

1. To qualify for the discount, schools must be public or nonprofit schools providing elementary or secondary education and which do not have endowments of more than \$50 Million. Only those libraries, which are eligible for participation in state based plans for funds under Title III of the Library Services and Technology Act qualify for the discount.
2. Qualifying schools and libraries shall be entitled to a 25%¹ voice/50% non-voice discount off tariffed and/or Product Guide rates or negotiated/contract rates, whichever are lower, for services identified in III.C. preceding, after first deducting the applicable E-rate discounts. The discount shall be calculated as follows:
 - a. If the customer has not been approved to receive E-rate discounts, whether or not an application is pending, the discount will be applied to all eligible services after deducting a statewide average E-rate discount (determined by the CPUC) from the billed amount.
 - b. For Federal E-rate program participants, the CTFs discount applies to eligible service costs minus the Federal E-rate subsidy. For E-rate schools, the CTF discount amount shall be no higher than their Federal E-rate subsidy. However, if an E-rate school's Federal E-rate subsidy for voice services is 0%, it will retain the CTF voice discount of 25%¹ or 50% CTF voice discount if it is exempt from a reduction in voice support.
 - c. The statewide average discount is deducted from the customer's services solely for purposes of calculating the CTF discount. The statewide average discount shall be added back to the billed amount for payment by the customer. However, when the customer receives its approved E-rate benefit, the customer's account will be retroactively adjusted to reflect the approved E-rate.

V. DISCOUNTS APPLICABLE TO ELIGIBLE SERVICES (Continued)

E. Rural Health Care Providers (RHCP)

Public or non-profit healthcare providers in rural areas may be eligible for Federal rural healthcare discounts under the Rural Health Care Program of the Universal Service Fund. Rural Health Care (RHC) funding received by a RHCP shall first be taken into account prior to applying the CTF discount to the eligible service charges subscribed by the RHCP. The 25%¹ voice/50% non-voice CTF discount shall be calculated as follows:

1. The 25%¹ voice/50% non-voice discount shall be applied to the entire CTF eligible service charges subscribed by the RHCP that does not apply for Rural Health Care (RHC) funding in a given fiscal year.
2. The 25%¹ voice/50% non-voice discount shall be applied to the entire CTF eligible service charges subscribed by the RHCP awaiting approval for RHC funding for the fiscal year. Once approved, the CTF discount shall be trueed up for that fiscal year to take into account the RHC funding received.

VI. HOW DISCOUNTS ARE APPLIED

- A. Federal funding or subsidy given to CTF participants for their CTF-eligible services shall first be taken into account prior to applying the CTF discount, as specifically noted in B through F below.
- B. By September 21, 2011, the Utility shall first apply the actual federal E-rate discount prior to applying the CTF discount to Community Based Organizations (CBOs) that offer Head Start programs with an actual E-rate discount.
- C. The Utility shall first apply the statewide average E-rate discount developed and updated annually by the Commission effective July 1st prior to applying the CTF discount if the school, library, and/or CBO that offers Head Start programs does not have an actual E-rate. However the implementation of deducting the statewide average E-rate discount before applying the CTF discount will not take effect until July 1, 2012, for CBOs offering Head Start programs that do not have an actual E-rate.
- D. Necessary Small Schools are exempt from deducting the statewide average E-rate discount if they do not have an actual E-rate discount. Notwithstanding subdivision (b), the CTF discount shall be applied without regard to the E-rate discount for any Necessary Small School, as defined in Section 42283 of the Education Code, unless that school has applied for, and been approved to receive, the E-rate discount.
- E. The Utility shall apply the CTF discounts to Rural Health Care Providers (RHCP) as follows:
 1. Apply 50 percent CTF discount on CTF-eligible services subscribed to by RHCPs that did not apply for RHC funding in a given fiscal year.
 2. Apply 50 percent CTF discount on CTF-eligible services subscribed to by RHCPs while awaiting approval for RHC funding for FY 2012-13 and beyond, then true-up the CTF discount for that FY.
 3. Adjust the CTF discount received by RHCPs when RHC funding is received after the issuance date of Resolution T-17314 for funding for FY 2010-11 and FY 2011-12.
 4. By September 21, 2011, the Utility shall deduct any federal funding received by RHCPs first before applying the CTF discount on CTF-eligible services.
 5. The Utility shall continue to apply the 50 percent CTF discount on CTF-eligible services for RHCPs that do not apply for RHC funding.
- F. A teleconnect discount shall be applied after applying an E-Rate discount. The commission shall first apply an E-rate discount, regardless of whether the customer has applied for an E-rate discount or has been approved, if the customer, in the determination of the commission, meets the eligibility requirements for an E-Rate discount.
